

Alkedo St Tropez 27/4/2025

Helm Andrea Lacorte

SAILS USED: M1-4, J1-6, A1.5-10

Sails Chase: M2-4 chase, J1.5-6, J2-4,
A1.5-11, A2-10, A2-11

Learning Points 27/4/2025

LP Upwind

- Stbd could be high and good power mode, better when sheeted on, as long as main didn't go too flat.
- Port faster fwd difficult to get FWD - need a bigger change in how we sail to get the Fast fwd mode.
- Crew Weight - Upwind we were not in sync, with the gusts as it went from offshore to onshore was different and we were off timing
- Rake we discussed being more aggressive in rake forward @ 9 – 10kts to straighten rig and allow more forestay.

Downwind

- Crew weight great DW, proactive and responsive
- Calls - 1 voice to give this focus
- Everyone needs to be alert and listening.
- Big guys move first, if first downstairs then first up on deck.

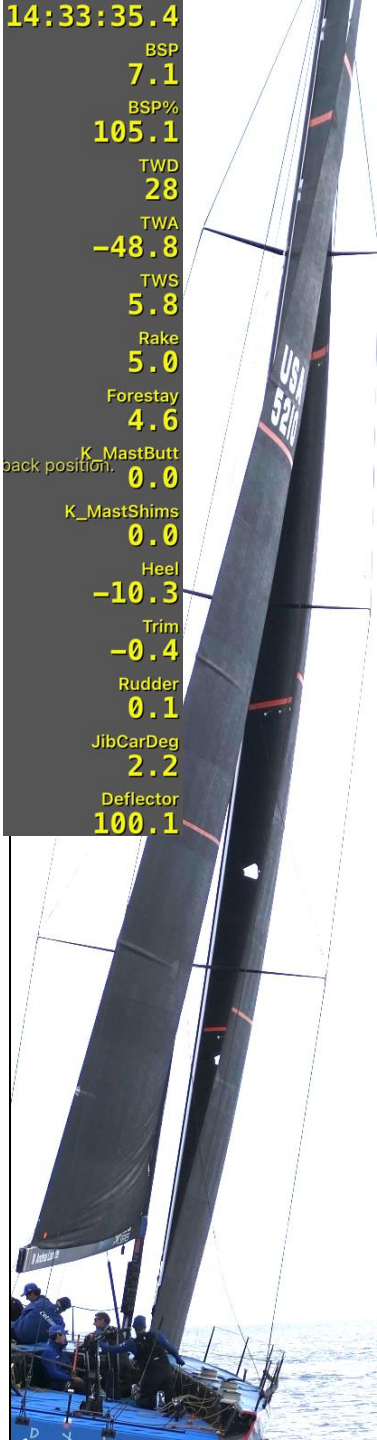

Handling

- Gybes in the light don't worry about the boom out too much
- Drops, Preload! And releasing the old leeward sheet after kite coming in
